Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 8, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Dysart. Dysart (Fig. 7-9) discloses a gage scraper (90) that is located on the leg (46) of a roller cone drill bit. It protrudes into close proximity with the gage surface to clean the gage surface. It is an insert (94) that is press fitted into a hole (92) on the inside of the leg. The distance from the axis of the bearing pin to the scraper is larger than the distance from the axis of the bearing pin to the gage surface. The cone has a gage surface and a backface, which is perpendicular to the axis of the bearing pin. There is a plurality of cutting elements protruding from the cone. The tip of the scraper is beyond the backface relative to the bearing pin axis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dysart in view of Goodwyn. Dysart shows all the limitations of the claimed invention, except it does not disclose that there is a backface scraper in addition to the gage scraper. Goodwyn discloses the use of a

backface scraper (D) with a roller cone. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the backface scraper of Goodwyn with the gage scraper of Dysart. This would be done for an extra protection against the infiltration of dirt causing wear to the bit.

Allowable Subject Matter

5. Claims 16-20 are allowed.
6. Claims 3, 4, 6, 7, 9 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zahradnik et al., Fletcher and Portwood et al. all show similar elements to the present invention.
